## FACE SHIELDS

Klein Tools Face Shields offer a great combination of safety, comfort, fit and convenience features. High-impact tested with proper coverage, they offer a high level of protection from small to large objects. Lightweight construction with low profile lens design provides flexibility to operate all day in a wide variety of applications. For proper fit, Klein Tools offers face shields specifically for cap style/safety helmet and full brim hard hats –no compromises. All face shields can be adjusted to properly position the flexible flap against the brim of the hard hats to ensure a good seal up against the shell. The mesh face shield, with a coated metallic screen, offers clear visibility and protection from flying debris and durability in a wide variety of environments. The modular design of the frame allows the user to add and remove the face shield while keeping mounts on the shell. Additionally, the mounts are designed to allow quick attachment of earmuffs with or without the face shields. High optical quality, anti-fog and scratch resistant coatings ensure enhanced visibility. Klein Face Shields are available in clear, gray tint, and mesh styles.
