New Aviation Wire Twisting Pliers

KLEIN TOOLS
For Professionals... Since 1857®

Klein's new wire twisting pliers are for the aviation professional who demands fast and consistent safety wiring. Designed with many features, such as automatic spring return rods and diagonal noses for easier access into hard-to-reach areas, the new wire twisting pliers help get the job done quickly and securely.

Features

Diagonal nose design for easy access into hard-to-reach areas.

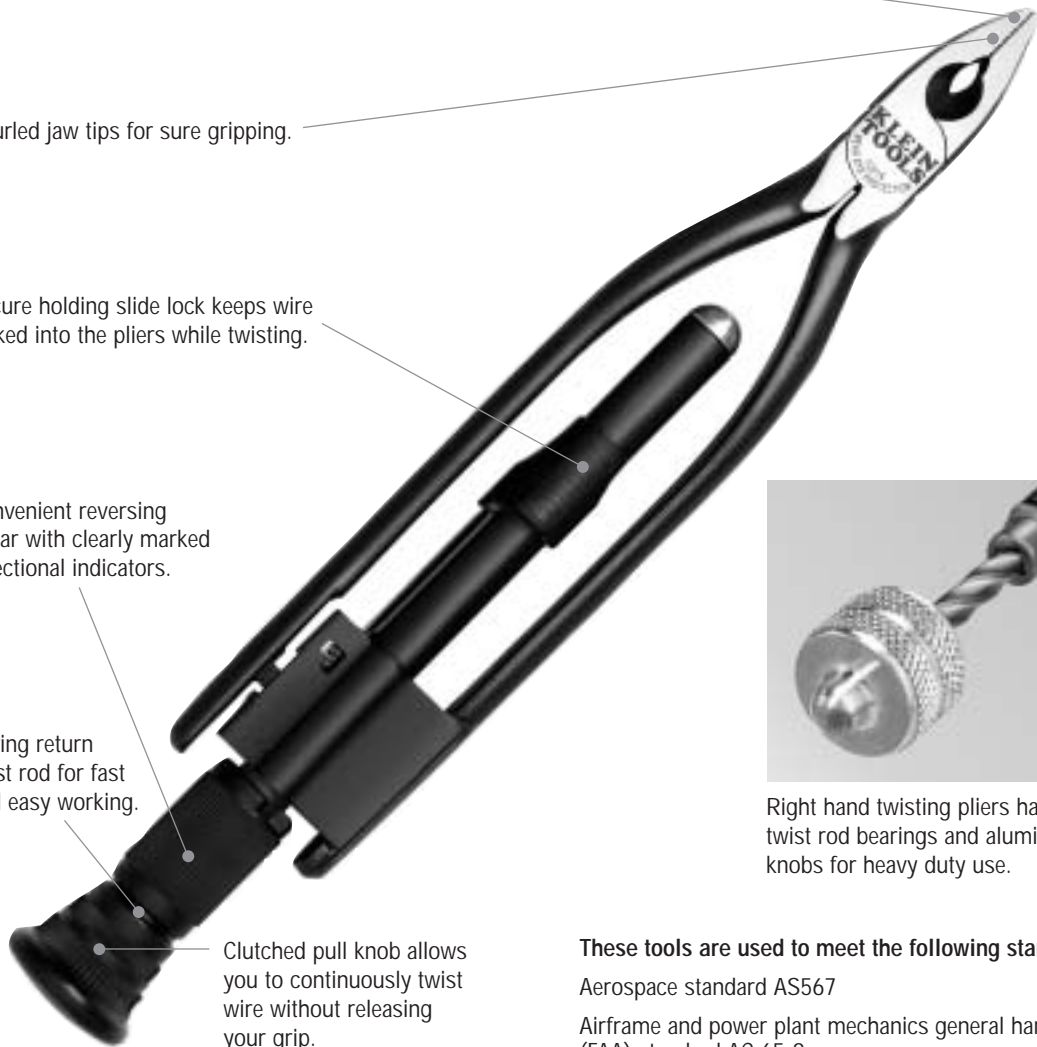

Knurled jaw tips for sure gripping.

Secure holding slide lock keeps wire locked into the pliers while twisting.

Convenient reversing collar with clearly marked directional indicators.

Spring return twist rod for fast and easy working.

Clutched pull knob allows you to continuously twist wire without releasing your grip.

Right hand twisting pliers have brass twist rod bearings and aluminum pull knobs for heavy duty use.

These tools are used to meet the following standards:

Aerospace standard AS567

Airframe and power plant mechanics general handbook (FAA) standard AC 65-9

Aircraft inspection and repair (FAA) standard AC 43.13-1A
