Klein Tools® Introduces New Digital Angle Gauge with Angle Alert to Notify User when Desired Angle is Reached

December 5, 2023 (Lincolnshire, Ill.) – Klein Tools (www.kleintools.com), for professionals since 1857, introduces the Digital Angle Gauge with Angle Alert, that can measure or set angles, check relative angles or be used as a digital level.

Digital Angle Gauge with Angle Alert (Cat. No. 935DAA)

- Digital Angle Gauge can measure or set angles, check relative angles with zero calibration feature or can be used as a digital level
- LEDs light up red, orange, or green based on how close the device's orientation is to the user defined angle
- Bright reverse contrast display is easy to see in all lighting conditions
- Strong magnetic base attaches to conduit, pipes, saw blades, vents, ducts and other ferromagnetic surfaces
- V-Grooves ensure a secure fit on the contours of conduit or pipe
- Display auto-rotates when upside-down for easy viewing
- Water and dust resistant with rating of IP54

“Klein’s new Digital Angle Gauge with Angle Alert helps address the problems professionals face when trying to find the correct angle on conduit, pipes, blades and more,” says Amy Hart, associate director of product management at Klein Tools. “The V-Grooves ensure a secure fit on conduit or pipe, and a strong magnetic base allows it to easily attach to ferromagnetic surfaces. That paired with the LEDs that light up based on how close the orientation is to the defined angle makes this the ideal gauge for professionals across any trade.”
