## Klein Tools® Launches Compact Green Planar Laser Level, Perfect for On-The-Go Leveling and Alignment

**January 11, 2024 (Lincolnshire, Ill.)** – Klein Tools ([www.kleintools.com](http://www.kleintools.com)), for professionals since 1857, introduces the Compact Green Planar Laser Level, a high performance laser leveling and alignment tool that can project clear, bright green 360° lines in the X-, Y- and Z-planes.

### Compact Green Planar Laser Level (Cat. No. 93CPLG)

- Rechargeable Self-Leveling Green Laser Level has 3 easy-to-see bright green 360° laser planes with a working range of 100' (30.5 m); up to 2 times brighter than regular red beams
- Compact and lightweight design with lasers in 3 planes is easy to use in tight areas and to store when not in use
- High precision laser projects clean lines with accuracy of 3/16" at 30' (9.1 m); auto out-of-level detection flashes lasers when no longer level
- Tilt mode allows for the laser level to be turned on while pendulum is locked for use at different angles
- Magnetic mounting bracket screws into integrated 1/4" tripod mount
- More than 6-hour runtime provides lasers power for all day use
- Durable overmold design is IP54 rated and protects the laser level from water and dust

“On brighter jobsites, standard red lasers can be harder to see, making work more difficult,” says Amy Hart, associate director of product management at Klein Tools. “We wanted this product to give trade professionals a compact bright green laser to improve visibility anywhere. Equipped with an integrated magnetic mount and 1/4" tripod mounting threads, Klein’s self-leveling laser level enables a multitude of alignment and layout applications.”
