“Given how many tasks need to be completed on any given jobsite, tradespeople need tools to make their jobs as efficient as possible,” says Kozeta Topchian, senior product manager – heavy infrastructure at Klein Tools. “All of the impact sockets in these sets feature two spring-loaded sockets in one tool, effectively cutting the number of tools required by 50%. That paired with having eight sizes in four sockets means carrying less and saving time because commonly used sizes are readily on hand.”
