“In the same way that other professionals have an office to hold all the supplies needed to do their job, Klein looked to create that for a lineman’s needs,” says Pierre Perez, associate director of product management at Klein Tools. “When designing the Bucket Work Center, our goal was to build a system that gave linemen tool storage and organization solutions for their bucket that were practical, durable and strong enough to hold all the tools that they use daily. The S-Hook System easily attaches to aerial buckets with a standard 2” or 3” bucket lip, making putting the system to use simple and quick. Klein’s Bucket Work System is the first of its kind, the only aerial bucket solution that lets you customize how you store your tools in ‘The Lineman’s Office.’ ”
