Klein Tools® Magnetic Wire Pulling System Receives Product of the Year Award *Product named Silver Award Winner by EC&M judges and readers*

Oct. 3, 2017 (Lincolnshire, Ill.) – Klein Tools (www.kleintools.com), for professionals since 1857, is proud to announce its [Magnetic Wire Pulling System](#) recently received the 2017 Electrical Construction & Maintenance (EC&M) Product of the Year Silver Award.

An industry panel of judges ranked 155 products, ultimately selecting 37 winners in popular categories, such as tools (accessory items), metering and monitoring equipment, luminaires, safety equipment and more. EC&M readers then participated in an online poll, narrowing down their favorite tools and devices to just three.

"Klein Tools works constantly to develop and create breakthrough solutions that professionals want and need to get the job done," says Mark Klein, co-president of Klein Tools. "Receiving industry innovation and design awards, like the EC&M Product of the Year, reaffirms our commitment to making innovative tools that allow electricians to work effectively and efficiently. We are proud to celebrate 160 years of creating durable products that tradespeople count on every day."

The Magnetic Wire Pulling System allows one person to pull cable behind finished walls easily, navigating through insulation and around other obstructions. The system includes a swivel leader eyelet that connects securely to accessories such as mesh wire-pulling grips. In addition, the non-marring nylon leader-pull offers 20 feet of heavy-duty nylon rope.

Established in 2000, the EC&M Product of the Year competition recognizes excellence in new product development in the electrical industry. Honoring inventiveness in product design, as well as improvements in safety and efficiency, the competition's two-fold judging and voting process determines the most groundbreaking products from the past year. Winning products drive electrical design professionals, installers and maintenance personnel to perform their jobs more efficiently and effectively.
