

Klein® Tools Heavy-Duty Ratcheting Bolt Cutter eliminates the need for multiple guy strand cuts

March 9, 2016 (Lincolnshire, IL) – Klein Tools (<http://www.kleintools.com>), for professionals since 1857, introduces the [Heavy-Duty Ratcheting Bolt Cutter \(Cat. No. 63RBCHD\)](#) that cuts through utility grade EHS and guy strand in one smooth, easy cut. The bolt cutter features a spring-loaded cable retention hook that snaps onto the cable in one hands-free motion and keeps individual steel strands from slipping out of the cutting jaws. The cutter also has longer handles and a smooth ratchet mechanism for extra leverage and ease of use.

- Cuts ¼" - ½" utility-grade guy strand, and up to 3/8" EHS
- Long handles for high leverage
- Lockplate prevents the jaw bolts from loosening or turning, keeping the jaws in correct alignment.

"Guy strand can be particularly challenging to cut because of all the individual steel strands," said product manager Jocelyn Aguero. "The retention hook holds all of the strands in place so it's easier to cut in one cycle. It also requires less force making the same cut easier and faster than other cutters on the market."
